

Edges

These images appeared to me while staring out of my garret window in Amsterdam on a still July evening. Late afternoon turned to dusk, turned to twilight, and then all went dark. This was more exciting than any movie.

Edges refers to the visual edges which dominate the work. It also refers to a kind of edginess which occurs when one's surroundings slowly, subtly change in a way that you can't tell when one point of view is overtaken by another.
